Points to be Covered by the DAD/ORE at the Economic Survey Meeting

1. That CIA and the Bureau of the Budget have agreed mutually to undertake a survey, in accordance with the specifications furnished to Defense representatives present, among the non-IAC agencies and the Department of State, but that Budget will not participate with CIA in the survey of agencies within the Department of Defense.
2. That, in view of the fact that the coordination of the economic intelligence requirements with both producing and using agencies of the Government will take some time to negotiate, CIA believes that the fact-finding portion of the survey can proceed simultaneously and reduce the overall time required for completion of the first phase of the project.
3. That, while this survey is being conducted primarily through the intelligence channels between CIA and the Department of Defense, it should be emphasized that the scope of the survey should include agencies other than intelligence agencies within each of the military departments which engage in any or all the foreign economic activities defined in the specifications for the survey.
4. That CIA will be prepared to render such assistance as it can to agencies within the Department of Defense during the conduct of the survey and that any inquiries in this respect should be referred to [REDACTED] code 143, extension 2803. 25X1A9a
5. That the question of a deadline has been left open in order to obtain the views of the various representatives present on this point and that if this question cannot be resolved in today's meeting, it might constitute the subject of a future meeting after this problem has been discussed with your respective agencies.

OMB Waiver Letter In ERU File
